key Insights

- **Electronics are our main money maker:** Electronics bring in over 85% of our total sales, making it by far our biggest and most important product category.
- **Our top cities: Bangalore**, **Delhi**, and **Hyderabad** are our best-performing cities where we sell the most products.
- **Who buys the most:** Our **Standard** and **Regular** customer groups bring in the highest total revenue for the company.
- **Safe and smart discounts:** We didn't give away huge discounts—we kept them at a controlled ~6%, which means our profit margins are safe and protected.
- **Plenty of total orders:** We successfully processed **150 orders** overall, showing a healthy flow of customer purchases.
- **Great cross-selling chance:** Since almost everyone buys Electronics, we have a wonderful opportunity to recommend Furniture, Stationery, and Accessories to those same customers to boost sales in those smaller categories.
- **Steady market spread:** Even though Bangalore, Delhi, and Hyderabad lead the way, cities like Pune, Mumbai, and Chennai give us a nice, steady stream of extra revenue.
- **VIP potential:** Our **Premium** customers might be slightly smaller in number, but they spend a lot, making them the perfect group for special loyalty rewards and exclusive offers.
